FUTURE.

THAI WAH PUBLIC COMPANY LIMITED

THAI WAH PUBLIC COMPANY LIMITED

**WE ARE A REGIONAL LEADER IN STARCH AND STARCH-RELATED FOOD PRODUCTS, A PIONEER IN THAILAND FOR STARCH, VERMICELLI AND NOODLES WITH A COMMITMENT TO INNOVATION AND OPERATIONAL EXCELLENCE.**

**VISION** to be a regional leader in starch and starch-related food products.

**MISSION** we will produce premium quality products to satisfy our customers, and work with pride, integrity and consistency.

# Our history -

## 1947

THAI WAH STARCH PUBLIC COMPANY LIMITED ("TWS") (ORIGINALLY KNOWN AS THAI WAH CO., LTD.) **WAS INCORPORATED IN 1947** TO INITIALLY BUY WOLFRAMITE, AN IRON OXIDE OF TUNGSTEN.

## 1952

TWS entered into the tapioca business by buying flour from many existing small factories in order to export to the United States of America. During that period tapioca flour was in great demand and Brazil and Indonesia, the two main producers, were unable to supply world demand. TWS decided to expand the tapioca business by buying cassava roots and processing its own tapioca flour.

TWS opened its first tapioca factory, known as Thai Wah 1,

on Sukhumvit Road and sold tapioca flour marketed under the company's own "ROSE" brand and was Welcomed by international buyers because its quality met international standards.

While TWS continued to develop its tapioca business, Thai Wah Food Products Public Company Limited ("TWFP") was pioneering the vermicelli business in Thailand. **In 1952, TWFP established a 13.5 rai factory in Bangna, Bangkok,** producing a superb quality mung bean vermicelli.

## 1963

TWS's tapioca business took another major leap forward and TWS purchased the entire tapioca network from its competitors. The transferred assets included factories on the Bangpakong River and in Rayong Province, making TWS a major player in the tapioca industry. Subsequently, TWS pioneered the export of tapioca flour to Japan.

By 1963, TWS had become **Thailand's largest exporter of tapioca** and its production of

flour continued to increase steadily for the next 20 years. The main location of the cassava plantations had expanded to Thailand's northeast, leading TWS to build factories in Nakorn Ratchasima, Udon Thani, Kalasin, and Kamphaeng Phet.

## 1985

1985 - Over the years TWFP successfully grew its business and is widely recognized today as the leader in the local vermicelli market with approximately more than 40% market share coverage. Its products are well recognized under the "Double Dragon", "Phoenix", and "Double Kilin" brands. TWFP expanded its business by establishing the largest vermicelli factory in Thailand in Banglane District, Nakorn Pathom Province in 1985 and commencing the automation of its vermicelli production line in the following year.

**In 1985, TWS was listed on the Stock Exchange of Thailand.**

# Our history -

## 1989

TWFP WAS SUCCESSFULLY LISTED ON THE STOCK EXCHANGE OF THAILAND.

## 1994

TWS co-invested with a state enterprise in Vietnam to establish a joint venture company, Tay Ninh Tapioca Joint Stock Company originally known as Tay Ninh Tapioca Company Limited, to produce and distribute tapioca starch and glucose syrup. TWS held a 70 percent interest in the Vietnamese company.

## 2009

TWFP started production and distribution of [rice noodles](#).

## 2015

The shareholders' meeting of TWS and TWFP approved the [amalgamation of TWS and TWFP](#) and also approved "Thai Wah Public Company Limited" as the name of the amalgamated entity.

## 2014

TWFP expanded its rice noodle and rice vermicelli production capacity by [constructing a new factory](#) in the same area as the vermicelli factory.

## 2017

TWPC expanded its tapioca starch manufacturing base to Cambodia, and its food manufacturing base to Vietnam.

## Core business –

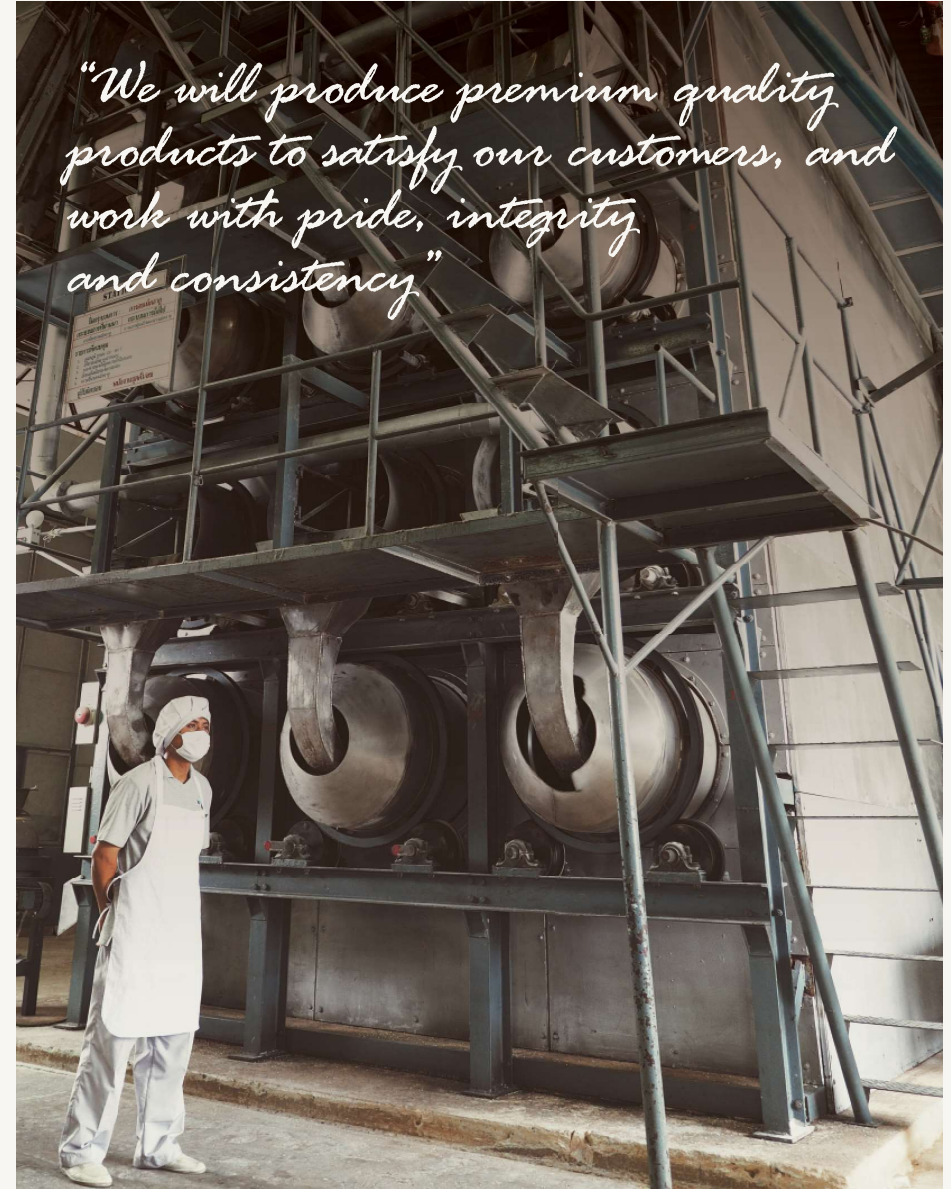

The Company's core businesses are divided into two main categories: The tapioca starch and related starch products business, and the food business for both local and international distribution, details as follows:

**Tapioca products** include tapioca starch, alpha starch, glucose syrup, coarse flour, sago (or tapioca pearl), and modified starch, all of which are manufactured and sold by the Company and its subsidiaries, namely Thai Nam Tapioca Company Limited, D I Company Limited, Thai Wah Alpha Starch Company Limited, and Tay Ninh Tapioca Joint Stock Company.

The Company and its related companies have a total of seven tapioca manufacturing plants, four of which are in Thailand (located in Nakhon Ratchasima, Udon Thani, Kalasin and Kamphaeng Phet), two plants in Vietnam, and one plant in Cambodia.

**Vermicelli and Rice Noodle products** include vermicelli, rice noodle, and Shanghai noodles which are manufactured and sold by the Company, having vermicelli as its main product.

The Company has two factories for manufacturing vermicelli and other noodle products. The factories are in Thailand (located in Banglen district, Nakorn Pathom) and in Vietnam. The production process employs a modern and efficient manufacturing technology which emphasizes quality and safety of the products for the consumer.

*"We will produce premium quality products to satisfy our customers, and work with pride, integrity and consistency"*

# Our Tapioca Starch products -

## TAPIOCA STARCH

Tapioca starch is a product derived from cassava roots. Apart from direct consumption, tapioca starch has many other uses in the food industry such as seasoning powder (MSG) and sweetener products, as well as uses in other industries including paper and textile.

## ALPHA STARCH

Alpha Starch is a type of modified tapioca starch using a physical modification process which is widely used in the aquatic animal feeds, mosquito repellents and metal casting industries.

## TAPIOCA PEARL

Tapioca Pearl is another food product derived from tapioca starch, which is widely popular among consumers both locally and in other East Asian countries such as China and Taiwan because it can be used in cooking both savory dishes and desserts.

## COARSE FLOUR

Coarse Flour is made from native tapioca starch, is commonly used for food applications such as batter and food mix, adopted for every day consumer food products to get variety in taste, texture and cooking method.

## MODIFIED STARCH

Modified Starch is another type of tapioca starch which is used for several industrial applications including paper and food for both the domestic and regional markets.

## GLUCOSE SYRUP

Glucose Syrup is made from the hydrolysis of starch which results in a slightly sweet sticky colorless liquid. Glucose Syrup is used as an ingredient in many food products such as candy, toffees, jams, juice powder, ice cream, creamer and other beverages.

# Delivering excellence -

Our "Double Dragon", "Phoenix", "Double Kilin" and "New Grade", Brands of vermicelli and noodle products can be found in a wide variety of well-known Thai and other Asian dishes. For over 70 years our brands have been known locally and internationally for their quality, taste and consistency.
